Welcome to Office Integrator

You have the app. We have the editors.

LOOKING FOR DOCUMENT EDITORS TO BUILD YOUR NEXT BIG DREAM? TRY ZOHO OFFICE INTEGRATOR—AN EASY, SECURE WAY TO INTEGRATE ZOHO'S WORLD-CLASS OFFICE EDITORS INTO YOUR WEB APPLICATIONS.

The Concept

- We've built Zoho Office Integrator for businesses that are building a web application of their own, but still need full-featured office editors to create, edit, and manage their documents. If you're a business with either of the following requirements, Zoho Office Integrator might just be perfect for you.
- You have a web application, but want a full-featured office editor to handle document management from within the app.
- Your business policy prohibits keeping customer data in a public cloud. So you need a solution that allows you to store these documents on your own servers, to ensure data compliance.
- Business users should have a seamless experience when they view, edit, and collaborate on Word, Excel, and Powerpoint files online.
- You want a document management solution that's easy to implement with minimal configuration and doesn't involve additional hardware costs.
- The integrated office solution should have an affordable and flexible pricing model.
